SUMMARY

Aspiring Android Developer skilled in Android App Development, Data Structures and Algorithms, Core Java, Kotlin, MVVM, Retrofit, RestAPI, MySQL, and SpringBoot. Collaborative, team player who is proficient in working with interdisciplinary teams and executing goal-oriented projects. Strongly interested in obtaining a Developer position to work on enhancing the user experience.

TECHNICAL SKILLS

Core Java | Kotlin | Android

Data Structures and Algorithms

MySQL | SpringBoot

Android Design Patterns

SOFT SKILLS

Team Work, Communication Skills, Proactive, Time Management, Problem Solving, Remote work and Online Collaboration

PROJECTS

USAToday App-Clone

- Cloned the USAToday news app with two fellow trainees in four days.
- The whole app was made with MVVM architecture and close-to-original-looking layouts.
- Using MySQL database, we created the required database and connected the app to the database using SpringBoot.
- Implemented the main features of the app like saving the news for later and sharing news on messaging apps.

Vyapar App-Clone

- Cloned Vyapar, an app used for managing expenses and sales of any kind of business, with three other fellow trainees in four days
- The whole app was made with MVVM architecture and close-to-original-looking layouts.
- Used Room database to save the data locally
- Implemented features like updating the expense and sales amount dynamically as we add expenses and sales, sharing the transaction details.

Furlenco App-Clone

- Cloned Furlenco, an app used for renting furniture in major cities in India, with two fellow trainees in four days.
- Used Lottie Animations, ViewPager, Shared Preferences, etc., to implement features like adding the furniture to the cart, saving the selected city during login screens.
- Created our own JSON file for API calling.

TrulyMadly App-Clone

- Cloned TrulyMadly app, a dating app with two other fellow trainees.
- Made pixel-perfect layouts of all the screens in the app using different type of layouts like Constraint layout, Relative layout, and Scroll views

PROFESSIONAL EXPERIENCE

Apprentice

Ordnance Defense Factory

10/2019 – 10/2020

- Design & Analysis of a Gearbox for an armored vehicle
- Design & Analysis of a Pneumatic cylinder for the rear hinge door of an armored vehicle

EDUCATION

Full Stack Android Development

Masai School

12/2020 – present

Data Structures, Algorithms and Soft Skills in an immersive Computer Science Program

Master of Engineering

University College of Engineering, Osmania University

09/2018 – present

Specialisation in CAD/CAM

Bachelor of Technology

JNTUH College of Engineering, Sultanpur

09/2014 – 05/2018

Graduate in Mechanical Engineering

Intermediate

Sri Gayatri Junior College

06/2013 – 05/2014

MPC(Maths, Physics, Chemistry)
